

TowerJazz to Participate at ICCAD 2016 to Showcase its Strong Presence in China and its Local Support for its Growing China Customer Base

October 11, 2016 at 5:00 AM EDT

Over the past two years, TowerJazz has more than doubled its revenue in China with over 40 active customers

MIGDAL HA'EMEK, Israel and SHANGHAI, China, Oct. 11, 2016 (GLOBE NEWSWIRE) -- [TowerJazz](#), the global specialty foundry leader, today announced participation at ICCAD China 2016 & Changsha IC Industry Innovation and Development Summit on October 12-13, 2016 to showcase its strong presence in China and local support for its growing China customer base. TowerJazz will highlight its unique technologies and its global manufacturing capabilities through its seven worldwide manufacturing facilities, including through TowerJazz Panasonic Semiconductor Co., Ltd. (TPSCo), the leading analog foundry in Japan.

TowerJazz will exhibit in booth 55-56, demonstrating its broad range of customizable process technologies, including SiGe BiCMOS and RF CMOS (SOI and bulk) for radio frequency and high performance analog (HPA) applications; CMOS image sensor (CIS); power management, including BCD and its patented Y-Flash and mixed-signal CMOS and MEMS capabilities. There will also be a focus by TowerJazz on enabling the China fabless design communities with foundry technology and design enablement for emerging markets such as IoT, automotive and wireless charging. Designer teams can learn about TowerJazz's novel design enablement tools and advanced modeling that leverage the tight interaction between EDA, models, and process technology to maximize the performance and yield while minimizing the time to market of these products.

ICCAD is the biggest annual forum and exhibition in China to showcase the latest IC industry technology offerings, and this year, it is being held in Changsha, Hunan Province where TowerJazz can explore new business opportunities on top of its existing and growing business in China. On October 13, 2016 from 13:55-14:20, Mr. Lei Qin, TowerJazz China Country Manager will present, "The Explosive Growth of RF ICs and related Product/Technology Trends," including a discussion on new circuit development, application directions, and the market landscape in 5G and IoT.

"With continuous and steady global capacity expansion, and a wide range of advanced analog technology offerings, we are able to meet the high volume production needs in China for analog ICs. We are here to support the China market and their emerging strong design houses with a focus on becoming global market leaders," said Todd Mahlen, Vice President of Sales Greater China and TPSCo Business Development. "ICCAD is a very important conference where we can meet with our existing and potential customers to reinforce our continued dedication to the China market and make them aware of the availability of TowerJazz's extended and advanced specialty foundry offerings."

About TowerJazz

Tower Semiconductor Ltd. (NASDAQ:TSEM) (TASE:TSEM) and its fully owned U.S. subsidiaries Jazz Semiconductor, Inc. and TowerJazz Texas Inc., operate collectively under the brand name TowerJazz, the global specialty foundry leader. TowerJazz manufactures integrated circuits, offering a broad range of customizable process technologies including: SiGe, BiCMOS, mixed-signal/CMOS, RF CMOS, CMOS image sensor, integrated power management (BCD and 700V), and MEMS. TowerJazz also provides a world-class design enablement platform for a quick and accurate design cycle as well as Transfer Optimization and development Process Services (TOPS) to IDMs and fabless companies that need to expand capacity.

To provide multi-fab sourcing and extended capacity for its customers, TowerJazz operates two manufacturing facilities in Israel (150mm and 200mm), two in the U.S. (200mm) and three additional facilities in Japan (two 200mm and one 300mm) through TowerJazz Panasonic Semiconductor Co. (TPSCo), established with Panasonic Corporation of which TowerJazz has the majority holding. Through TPSCo, TowerJazz provides leading edge 45nm CMOS, 65nm RF CMOS and 65nm 1.12um pixel technologies, including the most advanced image sensor technologies.
